(54) Title: METHOD AND APPARATUS FOR REVOCATION LIST MANAGEMENT

(57) Abstract: Access to information is controlled by maintaining, for a given device or other entity through which information may be accessed, a contact list that includes information identifying one or more other entities which have attempted to communicate with the given entity. In accordance with the invention, the contact list is utilized in conjunction with a revocation list stored in a memory associated with the given entity in order to determine which of the other entities are authorized to communicate with the given entity. The contact list includes a number of entries, each entry having at least an identifier of a particular one of the other entities and a corresponding revocation flag indicating whether the particular entity has been revoked. The contact list is updated after a modification of the revocation list, or if a new entity not already included in the contact list attempts to communicate with the given entity.

... **message delivery control for use in communication between computers connected in internet, involves transmitting only authorized message and allowing user to access only authorized received messages**

Abstract (Basic):

... Messages sent to and received from an **entity** whose electronic identifications that are included or not included in created allowed **list**, are categorized as **authorized** and **unauthorized**, respectively. **Authorized** outgoing messages are transmitted to their intended recipients. The **users** are then allowed to **access** contents of **authorized** incoming message.

... An allowed **list** comprising electronic **entity** identifications with whom the **user** is permitted to freely exchange messages, is created. The **authorization** for each **unauthorized** incoming and outgoing messages is further requested. The delivery or viewing of each message sent to or received from an electronic identification that does not appear on the allowed **list**, is **authorized**.

...child to an intended recipient who has not been approved by parent or guardian, during **access** of internet by children...

...the flowchart which depicts control of transmission of outgoing e-mail messages created by the **user**.

...Title Terms: **AUTHORISE** ;
